### Verifiable public endorsements from two of my former wonderful advisors:

- Prof. [Jose Hernandez-Orallo](#) (Director of Research at LCFI at Cambridge University, fully funded by OpenAI): “He [Lexin] has a very inquisitive and critical mindset, by far the most mature and talented undergraduate student that I’ve had in twenty years.”
- Dr. [Xing Xie](#) (Vice Managing Director at Microsoft Research Asia): “Lexin is a truly passionate and insightful young scholar. He possesses both the openness and inclusiveness that comes with a cross-cultural background, and the tenacity and dedication to continuously delve into scientific questions. He not only pursues technological breakthroughs but also focuses on the social significance behind technology. I believe his doctoral studies at Princeton will be a new starting point for him. May he always maintain his passion and curiosity, bravely explore the world of knowledge, and not only produce globally impactful results but also guide next generations to think about the positive interaction between technology and society. I look forward to having our paths crossing again someday, on even higher ground.”
